About Fairwood Golf & Country Club...

A fair but challenging course, Fairwood offers excellent private club conditions with smooth fast greens, great pace of play and well drained year-round playable turf conditions. The full size and length practice range, large practice green and short game areas are available for players who seek to fine-tune every element of their game. From the beginner just learning to play, to the low-handicapper, and everyone in between the course will provide both challenge and fun. Fairwood has earned the reputation for having some of the purest putting surfaces in western Washington. Undulated greens coupled with varying hole designs require a range of shots and players will often use every club in their bag throughout the 18 holes. It's very walkable with a range of tee boxes to accommodate all players.
